# **XRootDFS Documentation**

Release 0.1.1.dev20150929

**Invenio Collaboration** 

#### Contents

1	l .	1
	Filesystem interface	
	Opener	
	Environment	1
2	anges	3
3	ntributing	5
4	ense	7
5	thors	9

### CHAPTER 1

API

- 1.1 Filesystem interface
- 1.2 File interface
- 1.3 Opener
- 1.4 Environment

2 Chapter 1. API

CH	AP	ΓER	2

# Changes

Version 0.1.0 (released 2015-09-29)

• Initial public release.

### Contributing

Bug reports, feature requests, and other contributions are welcome. If you find a demonstrable problem that is caused by the code of this library, please:

- 1. Search for already reported problems.
- 2. Check if the issue has been fixed or is still reproducible on the latest *master* branch.
- 3. Create an issue with a test case.

If you create a feature branch, you can run the tests to ensure everything is operating correctly. The easiest is to run the tests using Docker:

```
$ docker build -t xrootd .
$ docker run -h xrootdfs -it xrootd
```

You can also run the tests locally:

```
$ ./run-tests.sh
```

You will however need to start a local XRootD server, e.g.:

```
$ xrootd -b -l /dev/null /tmp <tmpfolder>
```

where, <tmpfolder> is dependent on your system (e.g. on OS X it is /var/folders, while on Linux it can be left empty).

**Note:** XRootD have issues with Docker's default hostname, thus it is important to supply a host name to docker run via the -h option.
